SUMMARY

Software Developer with 2 years of experience in JavaScript, Python, and cloud-based web applications.

WORK EXPERIENCE

Web Developer at Swaragh Technologies

September 2024 - Present

- Designed and developed a multi-tenant SaaS architecture enabling multiple organizational applications, with Super Admin and PMS modules built using Node.js and React.
- Integrated Google Calendar API, optimized Core Web Vitals, and improved overall site performance.
- Implemented async requests, cron jobs, message queuing, and JWT-based authentication.
- Worked on frontend optimization, full-text search, and real-time features using WebSockets.

Developer at Tata Electronics

July 2023 - February 2024

Developed a hardware-level tracking application using Python (Tkinter). Transitioned from testing to development, gaining hands-on experience in full software lifecycle and automation.

PROJECTS

Multi-tenant SaaS Platform

[Portfolio Link](#)

Designed and developed a multi-tenant SaaS architecture enabling multiple organizations to access a suite of applications, including Super Admin and PMS modules. Ensured secure data separation, role-based access control, and scalability using React, Node.js, PostgreSQL, Docker, and Kubernetes.

Project Management System (PMS)

[Portfolio Link](#)

Built a comprehensive PMS to manage projects, features, tasks, checklists, and issues with real-time collaboration, stand-ups, and wrap-ups. Designed efficient APIs and optimized backend performance using React, Node.js, PostgreSQL, and Docker.

Appointment Management System (AMS)

[Portfolio Link](#)

Developed a robust appointment scheduling system supporting multiple roles—admin, staff, doctors, and patients—with real-time updates and Google Calendar integration. Built using Laravel, MySQL, and FullCalendar.

EDUCATION

2019 - 2023 B.E. in Electronics and Communication Engineering, VTU

GPA: 7.5/10

2019 Class 12 (PCMCs), PUE

88%

2017 Class 10, KSEEB

68.32%

SKILLS

Frontend	React, JavaScript (ES6+), HTML5, CSS3, TailwindCSS
Backend	Django, Django REST Framework, Express, Laravel
Programming	Python, JavaScript (Node.js), PHP, Lua, TypeScript (Learning)
Databases	MySQL, PostgreSQL
DevOps	Linux, Docker, Kubernetes, Nginx
Architectures	Multi-tenant Architecture, Monolithic Architecture, Microservices
Tools	GSAP, Core Web Vitals (PageSpeed Optimization), Git, Keycloak
